AKINKUNMI TAIWO MORAYO

Senior Product Designer (AI & Consumer Mobile)
+234 903 658 4218 | teeakinkunmi@gmail.com | https://morayoakinkunmi.com

PROFESSIONAL SUMMARY

Senior Product Designer with 5 years designing consumer mobile products from scratch: social video, AI chat and everyday money apps, across 2,000+ production screens. Works problem-first: frames what users actually need, builds a working prototype with Claude Code or V0, puts it in front of real users and iterates before engineering commits. Has designed AI-native experiences across text, voice and video, and builds functional prototypes independently, including an AI UI generator running on the Anthropic API. Brings motion and interaction craft through Figma Motion, Jitter and ProtoPie, and designs for the question that matters most in consumer apps: why would someone come back tomorrow?

CORE SKILLS & TOOLS

Product & UX: Consumer Mobile UX, Onboarding & Activation, Retention & Engagement Loops, AI-Native & Conversational UX, Personalization, Rapid Prototyping, Interaction & Motion Design, Design Systems, Accessibility (WCAG AA)

AI & Prototyping: Claude, Claude Code, V0, ChatGPT, Gemini, Google Stitch, Figma Agent, Higgsfield, Remotion (via Claude connectors), Vercel

Motion & Design: Figma, Figma Motion, Jitter, ProtoPie, Framer, Adobe Photoshop, Illustrator, InDesign

Research & Analytics: Usability Testing, User Interviews, Competitive Benchmarking, Funnel Analysis, Microsoft Clarity, UXCam, PostHog, Google Analytics, Notion, Linear

PROFESSIONAL EXPERIENCE

Lead Product Designer (Senior UI/UX) | Renncora — Live Streaming & Social Media Platform
Full-time • Aug 2026 – Present • Remote

- Owned product design end to end for a live-streaming and short-video social app (iOS, Android, web) used by creators in Nigeria and 180+ countries, building the design foundation from zero.
- Designed an AI companion across text chat, voice conversation and video call, available natively to 100% of users.
- Shaped multilingual AI voice training for 3+ Nigerian languages (Pidgin live; Yoruba and Igbo in pipeline), personalizing the experience for non-English speakers.
- Rebuilt the home screen as an immersive vertical-scroll feed after 12+ research sessions and benchmarking TikTok, Instagram Live and Kick, cutting visual clutter by 60% and deepening sessions.
- Crafted engagement features that bring people back: co-host management, live audience interaction and real-time messaging with status indicators and media sharing.
- Created a 120+ component design system, WCAG AA compliant, shared across mobile and web.

Product Designer | BroadMoney Payment — Remittance Fintech
Full-time • Oct 2024 – Present • UK (Remote)
Preview: broadmoneypayment.com

- Led the redesign of a UK-to-Nigeria remittance app across 150+ screens, reworking information architecture and interaction for dashboard, wallets, send money and settings.
- Replaced a full-KYC gate with skippable, tiered KYC, cutting first-transfer drop-off from 55% to 22% and lifting first-month transactions 2.3×.
- Tested with 8 users and benchmarked Wise and Lemfi, feeding 15+ iterations to onboarding and the send-money flow.
- Cut marketing site rage taps by 70% (0.17% to 0.05%) after tracing a 54.75% drop-off in Clarity; designed lifecycle emails (KYC, marketing, login alerts) and the web CRM.

Product Designer | Useful Media — Doxflowy (Document Automation & e-Signature)
Full-time • Mar 2026 – Aug 2026 • Nigeria (Remote)
Preview: doxflowy.com/document-automation/

- Introduced an AI document assistant (prompt input, inline suggestions, formatting controls) that replaced manual tagging and cut setup time by 40%.
- Shipped calculation and workflow tags so non-technical users automate dates, totals and conditional steps, saving an estimated 25% of prep time.
- Reworked onboarding into a progressive flow with an email-capture funnel for template downloaders, speeding time-to-first-document by an estimated 30%.
- Audited behavior monthly with heatmaps and session recordings, turning findings into 10+ sprint fixes per cycle; rage taps on template cards fell 31%.

Product Designer | Wosi Wosi — Fintech, Money Transfer
Contract • Dec 2025 – Mar 2026 • UK (Remote)

- Built a 200+ screen mobile banking experience from zero for UK-to-Nigeria transfers, from onboarding to account management.
- Assembled a 100+ component library and high-fidelity prototypes that halved design-to-dev handoff time.

UI/UX Designer | Help2Pay — Crypto-to-Fiat Payment Platform
Contract • May 2025 – Aug 2025 • Nigeria (Remote)

- Structured a 1,000+ screen consumer app unifying USDT-to-Naira, gift cards, bills and peer transfers, with jargon-free flows for non-crypto-native users.
- Developed the full brand identity and a documented component library that sped up developer handoff by 30%.

INDEPENDENT PROJECT

Stack Layer | AI UI Generator, built with Claude Code

- Prototyped a working AI tool where users describe an interface in plain English and receive four styled variants at once through the Anthropic API, with live previews and copyable code.
- Engineered a full-screen preview with five device breakpoints, realistic device frames, rotation, zoom and keyboard shortcuts.

EDUCATION

B.Eng. Computer Engineering | Federal University of Technology, Akure • 2023
Certificate, User Experience Design | Georgia Institute of Technology
