

AKINKUNMI TAIWO MORAYO

Senior Product Designer (UI/UX)

+234 903 658 4218 | teeakinkunmi@gmail.com | momouiuxdesign.framer.website

PROFESSIONAL SUMMARY

Senior Product Designer with 4+ years of experience delivering end-to-end mobile and web products across fintech, social media, document automation, and crypto — covering 2,000+ screens shipped to production. Track record of reducing drop-off rates by up to 70%, improving conversion funnels, and building scalable design systems (100–120+ components) adopted across platforms. Skilled in behavioral analytics (Microsoft Clarity, UXCam, PostHog) to pinpoint friction and validate design decisions with data. Experienced leading design within cross-functional remote teams, working directly with founders, PMs, engineers, and stakeholders from discovery through launch.

CORE SKILLS & TOOLS

Design: End-to-End Product Design, User Flows, Information Architecture, Wireframing, High-Fidelity Prototyping, Interaction Design, Design Systems, Brand Identity, Mobile-First & Responsive Design, Accessibility (WCAG AA)

Research & Analytics: User Interviews, Usability Testing (8–12 participants per round), Competitive Benchmarking, Behavioral Analytics (Heatmaps, Session Recordings, Rage Taps, Dead Clicks, Scroll Depth), Funnel Analysis, A/B Validation

Tools: Figma, ProtoPie, Microsoft Clarity, UXCam, PostHog, Google Analytics, Miro, Notion, Linear, Slack, Gamma

AI-Augmented Workflow: Claude, ChatGPT, Gemini, Google Stitch, V0 — for rapid research, ideation, user flow generation, prototyping, and stakeholder presentations

PROFESSIONAL EXPERIENCE

Lead Product Designer (Senior UI/UX) | Renncora — Live Streaming & Social Media Platform

Full-time • Aug 2026 – Present • Remote

Product Preview: <https://www.renncora.com/>

- Own and lead all product design for a live-streaming and short-video social platform (iOS, Android, Web) serving creators across Nigeria and 180+ countries — no prior Figma files existed; established the entire design foundation from scratch.
- Conducted 12+ user research sessions and competitive benchmarking against TikTok, Instagram Live, and Kick to define interaction patterns for the vertical Reelz feed, live streaming, co-host experience, and creator dashboard.
- Transformed the home dashboard into a lightweight, immersive vertical-scroll video experience — cutting visual clutter by 60%, enforcing content-first hierarchy, and increasing average session depth.
- Delivered the full AI chat module across 3 interaction modes — text chat, voice conversation, and video call — giving 100% of users the ability to interact with an AI assistant natively inside the app.
- Created the multilingual AI voice training interface supporting 3+ Nigerian languages (Pidgin English live, Yoruba and Igbo in pipeline) — expanding accessibility for non-English-speaking users across West Africa.
- Reworked the messaging module with real-time status indicators, media sharing, and streamlined thread navigation, plus live streaming controls for co-host management and audience interaction.
- Developed a 120+ component Figma design system from zero — tokens, typography, spacing, color, component variants — fully WCAG AA compliant and deployed across mobile and web for consistent handoff.

Product Designer | BroadMoney Payment — Remittance Fintech

Full-time • Oct 2024 – Present • UK (Remote)

Preview: <https://broadmoneypayment.com/>

- Led the full redesign of a cross-border remittance app (UK to Nigeria) across 150+ screens — restructuring information architecture, visual hierarchy, and interaction patterns for dashboard, wallets, send money, and settings.
- Replaced a high-abandonment full-KYC gate with progressive disclosure — reducing early drop-off by an estimated 35%, lifting first-use conversion, and driving higher task completion rates.
- Performed competitive UX analysis against Wise and Lemfi plus usability testing with 8 participants (4 internal, 4 external), directly informing 15+ iterations that tightened onboarding and send-money flow efficiency.
- Established a scalable Figma design system — tokens, typography, buttons, inputs, cards, modals, component variants — deployed across mobile, web, and the marketing site for cross-platform consistency.
- Overhauled the marketing site with product demos and blog content — post-launch Clarity data showed rage taps dropped

from 0.17% to 0.05% (70% reduction) and dead clicks fell from 9.19% to 8.70%, while session duration and return visits improved.

- Implemented continuous behavioral monitoring via Microsoft Clarity — identified a 54.75% drop-off rate on the pre-redesign site and used session data to prioritize fixes across every sprint.

Product Designer | Useful Media — *Doxflowy (Document Automation & e-Signature Product)*

Full-time • Mar 2026 – Aug 2026 • Nigeria (Remote)

Preview : <https://doxflowy.com/document-automation/>

- Executed monthly UX audits via Microsoft Clarity — heatmaps, session recordings, rage taps, dead clicks, scroll behavior — presenting findings in stakeholder standups to prioritize 10+ sprint fixes per cycle.
- Crafted the AI document assistant from scratch — prompt input, inline suggestions, formatting controls — replacing manual drag-and-drop tagging with an AI-powered flow that cut average setup time by 40%.
- Launched the calculation tags feature, letting users auto-compute dates, prices, and totals inside documents — eliminating manual math and reducing input errors for 100% of non-technical users.
- Introduced workflow tags — a system for users to set conditional steps and logic inside documents so the right fields, approvals, and actions trigger automatically based on input, saving an estimated 25% of document prep time.
- Refined template download cards with clearer CTAs and inline email capture — Clarity data confirmed rage taps dropped from 0.48% to 0.33% (31% reduction), dead clicks from 15.70% to 14.90%, and quick-backs from 11.27% to 10.44%.
- Drove a new conversion funnel capturing emails from free template downloaders who never signed up, and transformed onboarding into a progressive flow — accelerating time-to-first-document by an estimated 30%.

Product Designer | Wosi Wosi — *Fintech — Money Transfer*

Contract • Dec 2025 – Mar 2026 • UK (Remote)

Preview : <https://wosi-wosi.vercel.app/>

- Defined the full mobile banking experience (200+ screens) from scratch for UK-to-Nigeria transfers — structuring user journeys across onboarding, dashboard, send/receive, transaction history, and account management.
- Assembled a 100+ component Figma library from the ground up — palette, typography, tokens, variants — and delivered high-fidelity prototypes that cut design-to-dev handoff time by 50%.
- Launched the marketing site (now live) with WCAG-compliant contrast and inclusive design, positioning the brand as credible against competitors like Wise and Lemfi.

UI/UX Designer | Help2Pay — *Crypto-to-Fiat Payment Platform*

Contract • May 2025 – Aug 2025 • Nigeria (Remote)

- Structured the full mobile experience (1,000+ screens) for a crypto-to-fiat platform — unifying USDT-to-Naira conversion, gift cards, bill payments, and peer transfers into one app serving everyday users.
- Produced the complete brand identity from scratch (logo, colors, typography, iconography) with a documented Figma component library that maintained visual consistency and sped up developer handoff by 30%.
- Shaped the marketing site with jargon-free messaging and a frictionless sign-up flow, lowering the entry barrier for non-crypto-native users.

EDUCATION

B.Eng. Computer Engineering | Federal University of Technology, Akure • 2023

Certificate, User Experience Design | Georgia Institute of Technology
